Applications of Model Theory to Functional Analysis (Dover Books on Mathematics) Prof. Jose Iovino

During the last two decades, methods that originated within mathematical logic have exhibited powerful applications to Banach space theory, particularly set theory and model theory. This volume constitutes the first self-contained introduction to techniques of model theory in Banach space theory. The area of research has grown rapidly since this monograph's first appearance, but much of this material is still not readily available elsewhere. For instance, this volume offers a unified presentation of Krivine's theorem and the Krivine-Maurey theorem on stable Banach spaces, with emphasis on the connection between these results and basic model-theoretic notions such as types, indiscernible sequences, and ordinal ranks.

Suitable for advanced undergraduates and graduate students of mathematics, this exposition does not presuppose expertise in either model theory or Banach space theory. Numerous exercises and historical notes supplement the text.

From reader reviews:

George Marsh:

Book is to be different for each and every grade. Book for children until adult are different content. To be sure that book is very important normally. The book Applications of Model Theory to Functional Analysis (Dover Books on Mathematics) had been making you to know about other understanding and of course you can take more information. It is rather advantages for you. The guide Applications of Model Theory to Functional Analysis (Dover Books on Mathematics) is not only giving you much more new information but also for being your friend when you experience bored. You can spend your spend time to read your publication. Try to make relationship while using book Applications of Model Theory to Functional Analysis (Dover Books on Mathematics). You never feel lose out for everything if you read some books.

Theresa Braun:

Now a day those who Living in the era just where everything reachable by talk with the internet and the resources included can be true or not call for people to be aware of each info they get. How individuals to be smart in getting any information nowadays? Of course the reply is reading a book. Looking at a book can help persons out of this uncertainty Information particularly this Applications of Model Theory to Functional Analysis (Dover Books on Mathematics) book since this book offers you rich data and knowledge. Of course the info in this book hundred per-cent guarantees there is no doubt in it as you know.

Angie Blakney:

A lot of people always spent their free time to vacation or go to the outside with them friends and family or their friend. Do you know?
