Autonomous Flying Robots: Unmanned Aerial Vehicles and Micro Aerial Vehicles Kenzo Nonami, Farid Kendoul, Satoshi Suzuki, Wei Wang, Daisuke Nakazawa

The advance in robotics has boosted the application of autonomous vehicles to perform tedious and risky tasks or to be cost-effective substitutes for their - man counterparts. Based on their working environment, a rough classification of the autonomous vehicles would include unmanned aerial vehicles (UAVs), - manned ground vehicles (UGVs), autonomous underwater vehicles (AUVs), and autonomous surface vehicles (ASVs). UAVs, UGVs, AUVs, and ASVs are called UVs (unmanned vehicles) nowadays. In recent decades, the development of - manned autonomous vehicles have been of great interest, and different kinds of autonomous vehicles have been studied and developed all over the world. In particular, UAVs have many applications in emergency situations; humans often cannot come close to a dangerous natural disaster such as an earthquake, a flood, an active volcano, or a nuclear disaster. Since the development of the first UAVs, research efforts have been focused on military applications. Recently, however, demand has arisen for UAVs such as aero-robots and flying robots that can be used in emergency situations and in industrial applications. Among the wide variety of UAVs that have been developed, small-scale HUAVs (helicopter-based UAVs) have the ability to take off and land vertically as well as the ability to cruise in flight, but their most important capability is hovering. Hovering at a point enables us to make more effective observations of a target. Furthermore, small-scale HUAVs offer the advantages of low cost and easy operation.

From reader reviews:

Gerald Conway:

The e-book untitled Autonomous Flying Robots: Unmanned Aerial Vehicles and Micro Aerial Vehicles is the publication that recommended to you just read. You can see the quality of the e-book content that will be shown to an individual. The language that article author use to explained their way of doing something is easily to understand. The author was did a lot of research when write the book, to ensure the information that they share for your requirements is absolutely accurate. You also might get the e-book of Autonomous Flying Robots: Unmanned Aerial Vehicles and Micro Aerial Vehicles from the publisher to make you far more enjoy free time.

Christina McMullen:

Can you one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Attempt to pick one book that you just dont know the inside because don't ascertain book by its handle may doesn't work this is difficult job because you are frightened that the inside maybe not since fantastic as in the outside appear likes. Maybe you answer could be Autonomous Flying Robots: Unmanned Aerial Vehicles and Micro Aerial Vehicles why because the excellent cover that make you consider regarding the content will not disappoint a person. The inside or content is actually fantastic as the outside or maybe cover. Your reading sixth sense will directly show you to pick up this book.

Glenna Monaghan:

That guide can make you to feel relax. That book Autonomous Flying Robots: Unmanned Aerial Vehicles and Micro Aerial Vehicles was multi-colored and of course has pictures on the website. As we know that book Autonomous Flying Robots: Unmanned Aerial Vehicles and Micro Aerial Vehicles has many kinds or category. Start from kids until teens. For example Naruto or Investigation company Conan you can read and believe that you are the character on there. So , not at all of book are make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book for you and try to like reading in which.

Ruby Guillen:

What is your hobby? Have you heard that will question when you got students? We believe that that concern was given by teacher with their students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person such as reading or as studying become their hobby. You must know that reading is very important and also book as to be the thing. Book is important thing to incorporate you knowledge, except your current teacher or lecturer. You find good news or update about something by book. Amount types of books that can you choose to use be your object. One of them is actually Autonomous Flying Robots: Unmanned Aerial Vehicles and Micro Aerial Vehicles.
