Self-Experimenters: Sources for Study (Bibliographies and Indexes in Medical Studies) Paul A. Buelow

Self-experimentation, the deliberate design and implementation of an experiment using the experimenter's own body, is more common than is generally known. In fact, as this captivating reference book shows, hundreds of individuals over the centuries have used themselves as guinea pigs to test a theory or to understand a disease. The author provides a detailed history of the practice through numerous dictionary-style entries on self-experimenters and their experiments.

Each entry begins with biographical information about the experimenter and includes a brief narrative about the experiment, including its category, date and location, purpose, procedure, result, and significance. Medical history readers and researchers will find this book helpful both for its arrangement of data and for its indexing. The bibliographic references are a useful aid for those interested in further study. Offering easy access to a wide variety of biographical, scientific, and bibliographical information, *Self-Experimentation: Sources for Study* is a valuable reference work for those interested in historical and scientific research.

Frank Moore:

Reading a book to be new life style in this season; every people loves to examine a book. When you go through a book you can get a lots of benefit. When you read books, you can improve your knowledge, due to the fact book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your review, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, such us novel, comics, and also soon. The Self-Experimenters: Sources for Study (Bibliographies and Indexes in Medical Studies) offer you a new experiance in examining a book.

Lisa Saxon:

As a university student exactly feel bored for you to reading. If their teacher asked them to go to the library or make summary for some e-book, they are complained. Just very little students that has reading's heart or real their leisure activity. They just do what the professor want, like asked to the library. They go to right now there but nothing reading very seriously. Any students feel that reading through is not important, boring along with can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for

you. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Self-Experimenters: Sources for Study (Bibliographies and Indexes in Medical Studies) can make you experience more interested to read.
