Digital Fabrication in Architecture, Engineering and Construction Luca Caneparo

Digital technologies are changing the relationship between design and construction: with computer models, CAD/CAM, and prototyping, designers can gain direct control of building and construction processes. The ability to digitally model designs, and thus to use those models directly in the context of production, creates a synthesis between design and construction in keeping with the tradition of the close relationship between design and craftsmanship, between the quality of the design and the rules of the craft.

The evolution of the culture of design and construction is the underlying theme of this book. The aim is to discuss the direction that innovation is now taking, with a particular focus on today's cutting-edge architectures. The method addresses the ways in which different societies have dealt with the issues of their age regarding design and construction, the different contributions provided by various techniques, and with them the meanings expressed by the architecture.

As building design using digital tools requires specific skills in the fabrication processes and in the languages used by information technology, the book also offers a practical guide to new methods and techniques of managing and controlling fabrication for AEC. A systematic analysis of new skills used in the design process presents an overview of opportunities for architects and engineers.

By collecting information on significant projects and analyzing them, the book explores the technical and artistic potential of digital technology. The cases studied are the outcomes of groundbreaking projects which were able to give form and significance to technological research. They show that digital tools are not the exclusive prerogative of large firms but can also be adopted by teams working across small and medium-sized firms – firms which have been able to use informed research to link innovative design with the possibilities offered by digital fabrication in architecture.

From reader reviews:

Anthony Harrison:

This Digital Fabrication in Architecture, Engineering and Construction book is simply not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is definitely information inside this e-book incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This particular Digital Fabrication in Architecture, Engineering and Construction without we comprehend teach the one who looking at it become critical in imagining and analyzing. Don't end up being worry Digital Fabrication in Architecture, Engineering and Construction can bring any time you are and not make your carrier space or bookshelves' come to be full because you can have it within your lovely laptop even cell phone. This Digital Fabrication in Architecture, Engineering and Construction having fine arrangement in word along with layout, so you will not experience uninterested in reading.

Michael Auten:

This Digital Fabrication in Architecture, Engineering and Construction are usually reliable for you who want to certainly be a successful person, why. The reason of this Digital Fabrication in Architecture, Engineering and Construction can be among the great books you must have is actually giving you more than just simple studying food but feed a person with information that maybe will shock your earlier knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions in e-book and printed versions. Beside that this Digital Fabrication in Architecture, Engineering and Construction giving you an enormous of experience like rich vocabulary, giving you demo of critical thinking that we understand it useful in your day activity. So , let's have it and luxuriate in reading.

Lorri Nicholson:

The reason? Because this Digital Fabrication in Architecture, Engineering and Construction is an unordinary book that the inside of the guide waiting for you to snap it but latter it will jolt you with the secret this inside. Reading this book close to it was fantastic author who all write the book in such incredible way makes the content interior easier to understand, entertaining means but still convey the meaning fully. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This unique book will give you a lot of rewards than the other book include such as help improving your expertise and your critical thinking means. So , still want to postpone having that book? If I ended up you I will go to the book store hurriedly.

Wayne Kong:

Many people spending their period by playing outside together with friends, fun activity together with family or just watching TV the entire day. You can have new activity to pay your whole day by reading a book. Ugh, you think reading a book can actually hard because you have to accept the book everywhere? It fine you can have the e-book, having everywhere you want in your Smartphone. Like Digital Fabrication in

Architecture, Engineering and Construction which is getting the e-book version. So , why not try out this book? Let's see.
