## **Introduction to Geographic Information Systems** Kang-Tsung Chang

"Introduction to Geographic Information Systems, 5/e" is designed to provide students in a first or second GIS course with a solid foundation in both GIS concepts and the use of GIS. "Introduction to GIS" strikes a careful balance between GIS concepts and hands-on applications. The main portion of the chapter presents GIS terms and concepts and helps students learn how each one fits into a complete GIS system. At the end of each chapter, an application section with 2-7 tasks presents students with actual GIS exercises and the necessary data to solve the problem.
