## **Palaeoclimatology and Palaeoceanography from Laminated Sediments (Geological Society Special Publication Ser. ; No. 116) Anthony E. Kemp**

Concerned with laminated sediments of marine or lacustrine origin. Laminated sediments are unique in providing annual or sub-annual resolution, often recording individual depositional events. The book acts as a focus for results of current studies ranging from the Black Sea to the deep sea laminations of the equatorial Pacific. This volume will be of interest to geologists, sedimentologists, oceanographers and all who are concerned with climate change.

Also available:

Fishes and the Break-up of Pangea - Special Publication no 295 - ISBN 186239248X

Deep-Time Perspectives on Climate Change: Marrying the Signal from Computer Models & Biological Proxies - TMS002 (Micropalaeontological Society Special Publications) - ISBN 1862392404

The Geological Society of London

Founded in 1807, the Geological Society of London is the oldest geological society in the world, and one of the largest publishers in the Earth sciences.

The Society publishes a wide range of high-quality peer-reviewed titles for academics and professionals working in the geosciences, and enjoys an enviable international reputation for the quality of its work.

The many areas in which we publish in include:

- Petroleum geology
- Tectonics, structural geology and geodynamics
- Stratigraphy, sedimentology and paleontology
- Volcanology, magmatic studies and geochemistry
- Remote sensing
- History of geology
- Regional geology guides
