Biology: Today and Tomorrow without Physiology Cecie Starr, Christine A. Evers, Lisa Starr

Cecie Starr is the most successful author in non-majors biology because of her clear and engaging writing, trend-setting art, and unparalleled media. BIOLOGY TODAY AND TOMORROW, BASICS Edition (no physiology coverage) her most concise text, provides a precise, issues-oriented approach and "solves" some of the toughest course challenges: engaging students, linking concepts from chapter to chapter, easily monitoring students' progress and simplifying lecture prep. Show students how biology matters: opening each chapter with engaging essays on hot issues and related online voting, the text highlights the connections between biology and real-life. Online exercises promote critical thinking about issues students will face as consumers, parents and citizens. Link concepts from chapter to chapter: since students have a difficult time linking concepts, the authors created a new "linking" tool. A list at the start of each chapter reminds students of related topics that were explained earlier. Within chapters, a key icon identifies cross-references to relevant sections in earlier chapters. As students work through the text, they see how topics build upon one another. Monitor students' progress with ease: BiologyNow offers diagnostic quizzes with automatically graded results that flow directly into your instructor grade book (iLrn, WebCT or BlackBoard). And, to assess students' progress instantly with in-class quizzes and polls, you can use JoinIn on TurningPoint content and software. Enjoy easier lecture prep: The new PowerLecture tool integrates all electronic chapter assets - art, photos, animations, videos, links to InfoTrac articles, web links, bulleted text slides, and everything else you need into each chapter's lecture slides. This "buffet" of media resources-arranged by chapter section-is at your fingertips.

Stacey Sims:

Many people spending their time period by playing outside along with friends, fun activity using family or just watching TV the whole day. You can have new activity to invest your whole day by reading a book. Ugh, ya think reading a book can really hard because you have to take the book everywhere? It alright you can have the e-book, having everywhere you want in your Smartphone. Like Biology: Today and Tomorrow without Physiology which is having the e-book version. So , why not try out this book? Let's observe.

Donna Layne:

As a university student exactly feel bored to help reading. If their teacher questioned them to go to the library or even make summary for some guide, they are complained. Just very little students that has reading's heart and soul or real their pastime. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading very seriously. Any students feel that examining is not important, boring in addition to can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Biology: Today and Tomorrow without Physiology can make you sense more interested to read.
