This volume constitutes the proceedings of the 11th International Workshop on Groupware (CRIWG 2005). The conference was held in Porto de Galinhas (Recife), Brazil. The previous ten CRIWG workshops were organized in Lisbon, Portugal (1995), Puerto Varas, Chile (1996), El Escorial, Spain (1997), Buzios, Brazil (1998), Cancun, Mexico (1999), Madeira, Portugal (2000), Darmstadt, Germany (2001), La Serena, Chile (2002), Autrans, France (2003), and San Carlos, Costa Rica (2004). CRIWG workshops follow a simple recipe for success: good papers, a relatively small number of attendees, extensive time for lively and constructive discussions, and a high level of cooperation both within and between paper sessions. CRIWG 2005 continued this tradition. This 11th CRIWG exemplified the continuing interest in the groupware research area. Groupware researchers from 16 different countries submitted a total of 67 papers. Each of the 67 papers was reviewed by at least three members of an internationally renowned Program Committee, using a double-blind reviewing process. Based on the reviewers' recommendations 29 papers were finally accepted: 16 long papers presenting mature work, and 13 short papers describing work in progress. The accepted papers were grouped into 8 themes that represent current areas of interest in groupware research: groupware development, collaborative applications, workflow management, knowledge management, computer-supported collaborative learning, group decision support systems, mobile collaborative work, and work modeling in CSCW. In addition, we were pleased to have Gerry Stahl from Drexel University in Philadelphia, USA, a renowned specialist in CSCL, as keynote speaker.
