Minorities and the State in Africa

Minorities and the State in Africa

This book explores the various facets of the relationship between minorities and the state across Africa. The motivation for this collection lies in the growing need to understand the often tenuous relationship between minorities and the state. Through this collection, the editors and contributors present thoughtful ways for understanding forms of hegemony imposed by dominant groups in relational, national, and regional experiences. The book offers alternative conceptual and theoretical approaches and alternative research strategies for dealing with minority/majority issues, as well as resource control in historical and contemporary perspectives. This interdisciplinary framework draws into dialogue critical theories in the humanities and social sciences and brings together the discourses of scholars, policy makers, and activists whose experiences have led them to face forms of hegemonic control within the state. The relevance of minorities in state structures, issues of identity, human rights, and race as broadly conceived concepts, would serve well in informing new theories in this era of globalization. This volume consists of a set of nested themes that present minorities issues as fluid, contested, and under continues transformation, especially when examined within the larger context of a globalized human right agenda. The collection focuses on minority issues in contemporary Africa from a historical perspective, but also links these issues to global movements (such as international human rights) in an innovative manner. This book employs a cross-regional approach to explore specific issues in minority-state relations and human rights. This unprecedented approach holds the potential of serving as a foundation study for future research that seek to employ a comparative approach to specific issues in minority and human rights studies.
